

I am very opposed to the so-called "Broadcast Flag" that will erase the fair use rights over television programming that American citizens have always enjoyed.

The corrupt use of the federal government -- both executive and legislative branches

-- = to advance the monopoly power of a small number of commercial media companies

is contrary to every principle of copy rights and responsibilities that has made this

country the thought leader of the world. I urge you to eliminate the "Broadcast Flag"

and stop these efforts to pick winners in the digital media marketplace.
